

Cadastral Surveyor

- Are you a highly motivated and experienced Licensed Cadastral Surveyor?
- Do you enjoy solving complex survey problems?
- Do you want to have fun at work but be able to leave it behind at the end of the day?

Land Information New Zealand (LINZ) has an opportunity for a licensed cadastral surveyor in our Hamilton office.

The role of the Property Rights business group is to ensure surveys being integrated into the cadastre satisfy the regulatory standards set by the Surveyor-General. The majority of the Cadastral Surveyor team within Property Rights have recent private practice experience, which together with being exposed to the day to day application of the Rules for Cadastral Survey puts us in a great position to feed back practical difficulties being experienced by surveyors to the Office of the Surveyor-General. Here at LINZ, we are continuing to focus on how we work with our customers and stakeholders, which includes making access more readily available to cadastral surveyors. So if you're keen to help surveyors get things right then come and join us and make a valuable contribution to our dedicated team.

The role:

You'll be reporting to the Principal Cadastral Surveyor and will be one of the 'go to' experts for technical survey advice both within Property Rights and to other LINZ business groups, supporting our survey staff and providing advice to external surveyors helping ensure all outputs meet statutory requirements. You will be contributing towards and driving continuous improvement, education and ensuring LINZ is providing outstanding customer service.

To be successful in this role you will need:

- A Bachelor of Surveying or equivalent and be a Licensed Cadastral Surveyor
- Considerable practical surveying experience, knowledge of survey records, spatial and geodetic systems and processes, including use of Landonline
- Solid analytical and problem-solving skills
- Strong relationship building skills and customer focus

At LINZ we have a strong commitment to promoting work-life balance, while providing a healthy and safe working environment. We need people who are bold, unafraid to learn, try new things and get results. You will also to be passionate about connecting your expertise and knowledge with others because we believe we achieve the best outcomes when we work with others and support each other.

How to Apply

You can apply online at the LINZ careers website: <https://careers.linz.govt.nz>. You may view a position description at this site, as well as complete the on-line application, and upload a CV and cover letter. We are looking for evidence of your suitability for this role.

For further information please contact Mike Morris, Principal Cadastral Surveyor on mmorris@linz.govt.nz.

Applications close 5pm Friday 2 August 2019.
