

Graduate Surveyor

The Christchurch City Council's Survey Team is part of an in-house shared service comprised of technical and design professionals responsible for providing specialist advice and services across the Council. The team deliver a diverse range of cadastral and engineering survey services in support of both capital and operational projects, which contribute to the growth and success of our City.

With an increased workload, we are now looking for a Graduate Surveyor to join the team. Under the supervision of Licensed Cadastral Surveyors, you will be providing surveying services across a diverse range of horizontal and vertical infrastructure projects. The work activities will be wide and varied, providing an opportunity for you to work towards becoming a Licensed Cadastral Surveyor.

While ideally we are looking for a survey graduate who has some experience under their belt, we will also consider those who have finished their final year of study but still need practical experience to complete their degree.

The team utilise a modern and comprehensive fleet of terrestrial and aerial survey instruments to undertake fieldwork. Training will be provided where necessary to ensure a full understanding of the various instruments and software packages available.

With a beautiful central city location, good work-life balance and the opportunity to contribute to making Christchurch a better place to live and work, it's time to get in touch.

Additional Recruitment Information:

Work type: Permanent, Full-time position
