

LAND DEVELOPMENT ENGINEER - CHRISTCHURCH

Inovo Projects is not your traditional multi-disciplined company. Our team of 45 provides innovative specialist services in the disciplines of project management, project planning, resource management planning, engineering and surveying from offices in Auckland and Christchurch. Inovo is currently involved with some of the largest development projects in New Zealand, in a variety of fields including irrigation, tourism, commercial, residential and infrastructure, for corporate, government and private clients.

Following growth in our client base, an exciting opportunity exists for an intermediate to senior Land Development Engineer to join our Christchurch-based team. This specific role involved civil design and construction management for multi-lot developments and other civil-based projects. There will be a strong connection to the surveying and resource management disciplines.

Our ideal candidate will have;

- Previous New Zealand based design engineering experience
- Experience working on land development projects
- A relevant tertiary education, e.g. BE Civil, Engineering Diploma, or Surveying Qualifications
- Familiarity with 12d design software
- Design skills for Earthworks, 3 Waters and Roding
- Comfortable with NZS 3910 contract supervision
- The ability to organise work programmes, and work to timeframes
- Outstanding oral and written communication
- A confident and professional approach

Inovo offers an attractive remuneration package, career development potential, a diverse range of projects and a progressive work culture. Please email your CV, including cover letter, in confidence to Peter McAuley at peter@inovo.nz.

• INTERMEDIATE TO SENIOR LEVEL • WIDE VARIETY OF PROJECTS AND OPPORTUNITIES • PROGRESSIVE CULTURE
