

Land Surveyor Vacancy - Christchurch

Land Development / Surveying / Aerial Surveying / Engineering / Planning / Urban Design

At Fox and Associates we have an opportunity for a 'Land' Surveyor (recently licensed or near licensed) with the right stuff to join our team.

We are a well-established and progressive small to medium sized consultancy based in Christchurch helping our clients and communities to create legacies with their land.

We do this by employing and partnering with likeminded people whose purpose is to provide creative solutions with a focus on people, quality and innovation.

The services we deliver for our client include land and aerial surveying, civil engineering, planning and urban design consultancy services throughout the South Island (or on occasion further if required).

By joining our team, you will be:

- Involved with a wide variety of meaningful work projects
- Work experiences not typically found in companies of this size or available to all in the larger companies
- Receive on-going training and development opportunities
- Competitive salary package
- Flexibility in working hours

We are looking for people who share the same Core Values. How would you answer the following questions?

- Can you assist by adding to our already strong relationship network, a culture of teamwork and client focus, creating your own networks and enhancing our safe work environment?
- Will you work ethically, morally providing quality work and give back to your community?
- Are you a learner, who applies and shares your knowledge/skills, thereby adding to our company's ability to 'punch above our weight'?
- Do you consider yourself ingenious, innovative and adaptable and want to be part of team creating legacies with land directly through your efforts?
- We have a passion and enjoyment for our work, take pride in what we do and promise to take our customers along with us. Could you also commit to this?

If you want to be part of this opportunity apply to Carl Fox (carl@foxsurvey.co.nz), forwarding a Covering Letter, CV and any supporting information you feel might be relevant.

creating legacies with land
