

Surveyor for Vitruvius Ltd, Tauranga

The name 'Vitruvius' is synonymous with strength, utility and beauty.

Our strength lies in the skill of our people and the quality of the relationships we build. We manage, advise and deliver interesting projects from inception to perfection and our clients trust us implicitly to do what's best for the project – not what's best for ourselves.

We don't shy away from a challenge – in fact, we thrive on it. We love working closely with clients to solve problems and will always give a straight answer and offer pragmatic solutions.

We believe like-minded, quality relationships produce better outcomes for our clients. We constantly strive to produce our best work and deliver strong, functional and aesthetically-pleasing results for New Zealand communities.

Our company is locally-owned and small enough to remain agile and responsive, but large enough to partner with other experts and deliver projects on a national scale.

Who are we looking for? The role requires a survey graduate or technician that is passionate about land surveying and working in a client facing environment. This role will suit a positive and forward-thinking individual that enjoys delivering quality in their work.

The Brief:

The role will primarily assist with managing the delivery of projects for land development and infrastructure clients.

The role will be responsible for representing Vitruvius and interacting professionally with clients ensuring consistent, on time, in full and in specification execution of project work to enable clients to meet their solutions and requirements.

This will include technical design for land development projects, undertaking surveying and cadastral work, quality assurance, site surveys, related field work, planning activities, progress reporting and implementation of planned work schedules.

Above all the role will be a safety champion through implementation and adherence to safety plans HSE legislation, codes and practices.

The successful candidate will have:

- Graduate degree or diploma or equivalent experience in a cadastral survey role
- Experience working within a project team
- Understanding of the commercial aspects of projects
- Ability to work as part of a team and autonomously
- Ability to problem solve and make decisions
- Well organised with planning skills and be able to manage multiple priorities
- Excellent written and oral communication skills
