

Technical Surveyor (Intermediate or Specialist)

Location: Auckland

Work type: Permanent, full time

WOODS is a multi-disciplinary company providing Urban Design, Architecture, Engineering, Planning, Surveying and Geo-Spatial services to the land development, building, health, institutional, energy, government, and transport sectors, to name a few. Our rich history began nearly 50 years ago, and with more than 50 surveyors in Auckland and Christchurch, Woods has one of the largest surveying teams in New Zealand. Combining a diverse suite of technology means we can meet all surveying requirements — from topographical and site detail to LiDAR, UAV, Mobile and Terrestrial Scanning.

An organisation is nothing without its people, so we focus on hiring the best and supporting them through continuous professional and development programmes (CPD), consisting of formal and informal learning.

A technical survey role at Woods can offer;

- Leading survey technology including terrestrial scanning and UAV systems
- Work within a team of specialists across multiple technologies
- Exposure to a variety of technology including mobile scanning
- Environment to develop skills with the possibility to specialise and take on a lead role
- Opportunities to develop based on personal strengths.

We are seeking applicants who bring;

- Motivation and discipline
- Passionate about delivering quality
- Experience in Surveying technology and software
- Skills with UAV and photogrammetry favourable
- Fit into our team environment with ability to problem solve and lead
- Relevant tertiary education favourable.

Woods technical team are involved with some of NZ's largest and most prestigious rail, road, and aviation projects as well as commercial and residential construction.
