

LAND SURVEYING AND CIVIL ENGINEERING POSITIONS

- Live and work in the amazing Nelson Region
- Opportunity to apply your skills and grow your career
- Would suit experienced Surveyor or Civil Engineer

Land Dimensions Ltd provide a range of surveying and civil engineering services with an emphasis on subdivision and other infrastructure projects including residential and commercial development and Local Authority projects.

Land Dimensions are a successful local Nelson organisation who are dedicated to providing complete solutions for their clients including concepts, planning applications, detailed engineering design, surveying and construction management.

They now have positions available and are looking to attract people with either Land Surveying or Civil Engineering experience in the following areas:

- Engineering design.
- Contract management and administration.
- Construction supervision.
- Building and construction setout.
- Land Transfer surveying.

They would welcome applications from people with either a consulting or contracting background to an intermediate or senior level. Qualifications are not essential but it is important that you have a number of years New Zealand work experience.

Taking into account your range of skills and experience, Land Dimensions will tailor an attractive remuneration package and assist with relocation costs if necessary.

Applications close **Friday 29 March 2019**
