

# WHY HEIGHTS MATTER

NZVD2016 Hui 2019

Land Information New Zealand is organising a series of hui introducing regional and local councils, surveyors and other professionals to the new national height reference system: **New Zealand Vertical Datum 2016 (NZVD2016)**.

Join us to hear about this new height system, how it will benefit your work, your region, and New Zealand at large.

Following the success of the hui in Hawke's Bay two separate meetings will be held in each region.

The first is an introduction to NZVD2016 for council staff involved in decision making that uses height or sea level data.

The second meeting is aimed at Survey and Spatial New Zealand members and other professionals, with a focus on the technical aspects of NZVD2016.

## When & Where?

**Auckland:** 13 February 2019
